

Quiz Date: 8<sup>th</sup> June 2020

Q1. Computer mouse is also known as \_\_\_\_\_.

- (a) Pointing Device
- (b) Scanning Device
- (c) Sensing Device
- (d) Moving Device
- (e) All of the above

Q2. When a logic bomb is activated by a time-related event, it is known as a \_\_\_\_\_

- (a) Time-related bomb sequence.
- (b) Virus.
- (c) Time bomb.
- (d) Trojan horse
- (e) None of these

Q3. What type of virus uses computer hosts to reproduce itself?

- (a) Time bomb
- (b) Worm
- (c) Melissa virus
- (d) Macro virus
- (e) None of these

Q4. When a computer is switched on, the booting process performs \_\_\_\_\_

- (a) Integrity Test
- (b) Power-On Self-Test
- (c) Correct Functioning Test
- (d) Reliability Test
- (e) None of these

Q5. A compact disc is a data storage system of type \_\_\_\_\_.

- (a) magnetic
- (b) optical
- (c) electrical
- (d) electromechanical
- (e) None of these

Q6. Which of the following was the first computer language?

- (a) COBOL
- (b) BASIC
- (c) FORTRAN
- (d) PASCAL
- (e) None of these

Q7. Which type of symbol used in assembly language?

- (a) codes

**BANKERS**

**adda247**

- (b) mnemonics
- (c) assembler
- (d) machine codes
- (e) None of these

Q8.What action is performed by pressing Ctrl + E in MS-WORD?

- (a) Exit Application
- (b) Select All
- (c) Clear All
- (d) Align Center
- (e) None of these

Q9.What is Linux?

- (a) Input Device
- (b) Operating system
- (c) Storage Device
- (d) Output Device
- (e) Processor

Q10.Which key is used to delete one character at a time to the left?

- (a) DEL
- (b) CAPS LOCK
- (c) CTRL
- (d) SHIFT
- (e) BACK SPACE

Q11.What is that computer program called which translates one program instruction at a time into machine language?

- (a) Compiler
- (b) CPU
- (c) Assembler
- (d) Simulator
- (e) Interpreter

Q12.What does a computer system includes?

- (a) Hardware
- (b) Software
- (c) Peripheral devices
- (d) All of these
- (e) None of these

Q13.An input device that utilizes a light-sensitive detector to select objects on a display screen is known as \_\_\_\_\_.

- (a) Optical scanner
- (b) Touch screen
- (c) Light Pen

- (d) Mouse
- (e) Keyboard

Q14.A \_\_\_\_\_ is used to direct and dispatch data packets between different networks.

- (a) Connection
- (b) Bridge
- (c) Gateway
- (d) Hub
- (e) Router

Q15.What does GUI stand for?

- (a) Graphic User Interface
- (b) Graphical User Interface
- (c) Graphic Universal Interface
- (d) General Utility Interface
- (e) None of these

S1. Ans.(a)

Sol. A computer mouse is a pointing device (hand control) that detects two-dimensional motion relative to a surface. This motion is typically translated into the motion of a pointer on a display, which allows a smooth control of the graphical user interface

S2. Ans.(c)

Sol. Time bomb is a type of computer virus that lies dormant for an amount of time until it finally comes out and causes a computer program to be deleted or freeze.

S3. Ans.(b)

Sol. A computer worm is a standalone malware computer program that replicates itself in order to spread to other computers.

S4. Ans.(b)

Sol. When power is turned on, POST (Power-On Self-Test) is the diagnostic testing sequence that a computer's basic input/output system (or "starting program") runs to

determine if the computer keyboard, random access memory, disk drives, and other hardware are working correctly.

S5.Ans.(b)

Sol. Compact disc (CD) is a digital optical disc data storage format.

S6.Ans.(c)

Sol. FORTRAN(Formula Translation) was the first widely used high level general purpose programming language to have a functional implementation. FORTRAN was invented at IBM by John Backus. FORTRAN is a general-purpose, imperative programming language that is especially suited to numeric computation and scientific computing.

S7.Ans.(b)

Sol. In assembly language, mnemonics are used to specify an opcode that represents a complete and operational machine language instruction.

S8.Ans.(d)

Sol. Ctrl+E is used for align center.

S9.Ans.(b)

Sol. Linux is a Unix-like and mostly POSIX-compliant computer operating system (OS) assembled under the model of free and open-source software development and distribution.

S10.Ans.(e)

Sol. Back space key deletes the character at that position, and shifts back the text after that position by one position.

S11.Ans.(e)

Sol. Interpreter Takes Single instruction as input and Compiler Takes Entire program as input.

S12.Ans. (d)

Sol. A computer system includes hardware components, software, peripheral devices.

S13.Ans.(c)

Sol. A light pen is a pointing device that uses a photoelectric (light-sensitive) cell to indicate a position on the display screen.

S14.Ans.(e)

Sol. A router is used to route data packets between different networks. It reads the information in each packet to tell where it is going. If it is destined for an immediate network it has access to, it will strip the outer packet (IP packet for example), readdress the packet to the proper Ethernet address, and transmit it on that network.

S15.Ans.(b)

Sol. A Graphical User Interface (GUI) is a usual interface that allows users to interact with the computer through graphical elements such as pictures and animations.
